GEORGI PETRUSHEV

Owner of L&G

Fort Washington, MD 20744

george.petrushev.bell@gmail.com

(443) 824-5866

Highly skilled in Network Engineering and Geographic Information Systems with over 7 years of progressive experience with comprehensive data and telecommunications. Multiskilled professional with good all-round functional and technical expertise. Extensive knowledge of monitoring and controlling data and network communications traffic all while meeting tight deadlines and leadership demands. In 2017 I have started showing interest in programming. Then, I decided to improve my programming skills with different online courses, like TeamTreeHouse, FreeCodeCamp, Udemy. In each course, I developed different sets of technical skills, such as HTML, CSS, JavaScript, jQuery, Bootstrap, etc. If you would like to see a more you can check my portfolio(web page) or check my GitHub profile. My current goals as a professional are to learn as much as possible about diverse technologies and to improve my programming skills and knowledge. At this stage of my journey, I would say that I have a good foundation. However, I believe I have a lot to learn. In my opinion, I am a quick learner with a good problem-solving mindset, anything thinking, and I am not afraid to dig deep into more complicated topics.
